SUBJECT: Vietnam Lowers Tariffs on Wide Range of Foods and Animal Feeds

HANOI 00001562 001.2 OF 010

¶1. On August 3, 2007 the Government Office of Vietnam issued directive No.18/2007/CT-TTg entitled Urgent Measures to Restrain Market Prices. The directive made significant reductions for a number of foods and animal feeds, most of which have seen significant price increases recently on the world market as agricultural prices in general have spiked. The directive termed the cut temporary, although no date for reinstatement of the old tariffs was given. The directive is aimed at restraining inflation, which has seen a sharp increase over the past year and which in this low-income country is particularly sensitive to food prices.

¶2. The tariffs cuts are significant (from 30 to 60 percent) and across a wide range of products. Some reductions, including those for chicken meat, certain beef cuts, corn and meat and bone meal, go significantly beyond final bound rate commitments that Vietnam was to phase in over the next five years as part of their recent WTO accession agreement. Because of higher prices, the new tariffs will be to an extent revenue neutral. Still the cuts indicate that government officials understand the value of lower import tariffs in sustaining economic development. It also shows an encouraging capacity to resist protectionist pressures in order to carry out sound economic policy. The tariff reductions should be beneficial to U.S. exports particularly in some key areas (chicken meat, beef, dairy) that have grown rapidly recently even with the higher tariffs.

¶3. Vietnam has shown in the past a willingness to permanently lower agricultural tariffs to support rapidly expanding domestic industries like textiles, livestock, aquaculture and furniture. Vietnam should be encouraged in its own interest to continue this trend toward more open markets by making this more consumer-oriented list of temporary cuts permanent and pursuing even further cuts.

¶4. The following table shows the reductions:
